Ze-Wen Koh

Department of Earth, Atmospheric, and Planetary Sciences, Massachusetts Institute of Technology

email: kohzewen@mit.edu ⋄ *website:* kohzewen.github.io

RESEARCH INTERESTS

I study the formation and evolution of planetary surfaces. Currently, my work focuses on the interactions between climatic forcing and landscape evolution on Earth, early Mars, and Titan. By leveraging remote sensing data analysis, numerical modelling, fieldwork, and theory, I aim to bridge the gap between climate predictions and surface observations for planetary hydroclimates.

EDUCATION

Massachusetts Institute of Technology (MIT) — **Cambridge, MA**
Doctor of Philosophy (Ph.D), Planetary Science — *2023 – present*
- Dissertation title: *Climate-landscape interactions of ocean worlds*
- Advisor: Dr. Gaia Stucky de Quay

Cornell University — **Ithaca, NY**
Bachelor of Arts (B.A.), Physics and Computer Science — *2019 – 2023*
- Graduated *summa cum laude*

AWARDS & HONORS

Grayce B. Kerr Fellowship | *MIT*	2024, 2025
Ida M. Green Summer Fellowship | *MIT*	2023
Praecis Presidential Graduate Fellowship | *MIT*	2023
SETI Forward Award | *SETI Institute*	2022
John Mather Nobel Scholarship | *NASA Goddard Space Flight Center*	2022
Cranson and Edna B. Shelley Prize for Undergraduate Research | *Cornell University*	2022
Phi Beta Kappa Honor Society | *Cornell University*	2022
Roger and Mary Lou West Fellowship in Astronomy | *Cornell University*	2021
Dean's List | *Cornell University*	2019, 2020, 2021

RESEARCH EXPERIENCE

Massachusetts Institute of Technology (MIT) — **Cambridge, MA**
Department of Earth, Atmospheric, and Planetary Sciences — *2023 – present*
- Graduate student advised by Dr. Gaia Stucky de Quay
- Ph.D Thesis: *Climate-landscape interactions of ocean worlds*

NASA Goddard Space Flight Center/Catholic University of America — **Washington, DC**
Planetary Magnetospheres Lab — *2022 – 2023*
- CRESST II intern advised by Dr. Gang Kai Poh
- Research description: MAVEN measurements of Kelvin-Helmholtz vortices at Mars

Cornell University — **Ithaca, NY**
Department of Astronomy — *2021 – 2022*
- Undergraduate student advised by Dr. Jonathan Lunine and Dr. Francis Nimmo
- Research description: detecting Europa's seafloor topography from Europa Clipper gravity experiments

Cornell University — **Ithaca, NY**
Department of Astronomy — *2020 – 2021*

- Undergraduate student advised by Dr. Phil Nicholson
- Research description: bending wave profiles in Saturn's rings derived from Cassini stellar occultations

8. ***Koh, Z.**, Nicholson, P.D., Hedman, M.M., French, R.G., Measuring the Amplitudes of Bending Waves in Saturn's Rings. *54th Annual DPS Meeting*, 2022. Abstract 301.07

9. **Koh, Z.**, Nimmo, F., Lunine, J.I., Mazarico, E., Dombard, A.J., Assessing the Detectability of Europa's Seafloor Topography from Europa Clipper Gravity Data. *53rd LPSC*, 2022. Abstract 1276

Invited Talks

- **University of Cambridge** | Department of Earth Sciences Colloquium   2025
- **Imperial College London** | Department of Earth Sciences and Engineering Colloquium   2025
- **NASA Jet Propulsion Lab** | Europa Clipper Lecture Series   2023

TEACHING EXPERIENCE

Department of Earth, Atmospheric, and Planetary Sciences, MIT

- **Exploring Solar System Surfaces** | Teaching Assistant   2025
- **Intro to Geophysics & Planetary Science** | Teaching Assistant   2025

Department of Computer Science, Cornell University

- **Data Structures & Functional Programming** | Teaching Assistant   2021
- **Object-Oriented Programming & Data Structures** | Teaching Assistant   2020, 2021

MENTORING EXPERIENCE

Yihong (Amy) Chen   **2025 − 2026**
Undergraduate Research Opportunities Program (UROP)   *MIT*
- Project title: *Effects of Precipitation on Hawaiian Fluvial Erosion*

RELEVANT SKILLS & COURSEWORK

Programming & software	Python, Julia, Java, C, Fortran, MATLAB, GIS tools (ArcGIS, QGIS), Git, Linux shell scripting, GDAL, Generic Mapping Tools (GMT), Adobe Creative Suite (e.g., Illustrator)
Numerical modeling	Fluvial erosion and flow routing models, drainage extraction, open-source landscape evolution models (e.g., Landlab), hydrological balancing and limnology, finite volume simulations, GPU-based computing
Fieldwork skills	Fluvial geomorphic mapping, sampling, and grain size measurements (Baker River, NH, 2023) ⋄ Crustal structure, tectonics, fault motions; measurements with gravimeters, seismometers, and high-precision GPS (Catalina Island, CA, 2024) ⋄ Coastal geomorphology (Cape Cod, MA, 2024)
Select coursework	Geomorphology, Coastal Geomorphology, Essentials of Field Geophysics, Principles of Remote Sensing, Fluid Dynamics of the Atmosphere and Ocean, Fluid Dynamics in Planetary Systems, Planetary Surface Processes

PROFESSIONAL ACTIVITIES

Service and Outreach

- **Let's Invest in K-12 (LINK-12)**, MIT EAPS | Classroom volunteer   2025 − present
- **Letters to a Pre-Scientist**, USA | Volunteer   2024 − present
- **Application Mentorship Program**, MIT EAPS | Leadership team, Mentor   2024 − present
- **MIT EAPS Student Advisory Committee (E-SAC)** | Marketing Officer   2024 − present
- **MIT EAPS Student Advisory Committee (E-SAC)** | Open House Officer   2023 − 2024
- **Cornell Malaysian Association** | Vice President   2021 − 2023

Open-Source Projects

- **PyMAVEN**: Access, processing, and plotting library for MAVEN magnetic field and plasma measurements
